TECHNICAL SKILLS

Frontend: React.js, Redux, Hooks, Context API, Jest, Cypress, Axios, JavaScript, HTML, CSS
Backend: Node.js, Express, SQL, PostgreSQL, GitHub, VS Code, Heroku
Additional Skills: Algorithms, Architecture, Debugging, Deployment, Client Customer Service

EXPERIENCE

Underdog Devs, *Remote - Full-Stack Engineer*   July 2022-Dec 2022
- Fixed numerous bugs found in the frontend and backend while writing clean, easy-to-read code. Worked with Data Analysts, Product Managers, and Senior Devs. Used React for the front-end and Node.js with Postgres for the back-end

Weave, *Remote - Tech Support*   Dec 2022 - Present
- Provided technical support to 30-40 clients a day over the phone to help troubleshoot our software

Fidelity Investments, *American Fork, UT - Financial Representative*   Feb 2019 - Nov 2020
- Provided professional and personable solutions over the phone to over 50 clients a day in regards to their financial account needs such as trade execution issues and transactions, money movement transactions, and account features which resulted in an increase in customer loyalty and satisfaction

PROJECTS

Water My Plants, *Backend Developer*   [[GitHub](#)]
React | PostgreSQL
- Application helps the user water their plants by giving them a specific timer for each plant they may have
  - Created the backend database by writing endpoints to retrieve, update, insert, and delete data using RESTful architecture using Node.js, Express, and Postgres
- Practiced test-driven deployment using Jest and Supertest, ensuring usable endpoints

Secret Family Recipe Cookbook, *Front End Developer*   [[GitHub](#)],[[App](#)]
React | PostgreSQL
- Application essentially replaces a cookbook, letting the user add, edit, and delete multiple recipes
- Collaborated with backend developers to ensure smooth progress of application development and fluid data flow
- Managed global state through the help of the useReducer hook to ensure simplicity in storing complex data

Nasa-photo-of-the-day, *Front End Developer*   [[GitHub](#)],[[App](#)]
React | CSS
- Application shows user Nasa's photo of the day and lets user choose any previous dates
- Uses Styled-Components, Axios to retrieve the data, and the useState hook to manage state

EDUCATION

BloomTech (FKA Lambda School), *Graduate, Full Time Program, Full Stack Web Development*   Jan 2021 - Dec 2022
Utah Valley University, *Bachelors, Personal Financial Planning*   Aug 2016 - Nov 2019
