PROJECTS

Water My Plants, *Backend Developer*   [GitHub}
React | PostgreSQL
- Application helps the user water their plants by giving them a specific timer for each plant they may have
- Created the backend database by writing endpoints to retrieve, update, insert, and delete data using RESTful architecture using Node.js, Express, and Postgres
- Practiced test-driven deployment using Jest and Supertest, ensuring usable endpoints

Secret Family Recipe Cookbook, *Front End Developer*   [GitHub],[App]
React | PostgreSQL
- Application essentially replaces a cookbook, letting the user add, edit, and delete multiple recipes
- Collaborated with backend developers to ensure smooth progress of application development and fluid data flow
- Managed global state through the help of the useReducer hook to ensure simplicity in storing complex data

Nasa-photo-of-the-day, *Front End Developer*   [GitHub],[App]
React | CSS
- Application shows user Nasa's photo of the day and lets user choose any previous dates
- Uses Styled-Components, Axios to retrieve the data, and the useState hook to manage state
